Condair: Your Water Experts

Reverse osmosis aids in the removal of unwanted minerals and bacteria from water. When paired with humidification systems, the Condair RO-H provides operation, energy and maintenance benefits for small scale humidifiers. By treating the humidifier's supply water, any scale buildup in the system is virtually eliminated and hygienic operation is achieved.

Model	RO-H
Permeate Capacity 59°F (15°C)	158 gpd (26 lph)
Tank	External Pressure Tank 3.17 gal (12 l) with booster module / 4.75 gal (18 l)
Pair with	Condair RS Condair MN
Scope of Delivery	<ul style="list-style-type: none">• RO system with membranes• Sediment, carbon filters• Storage Tank with mounting bracket• Water supply and drain installation set

Even if it appears clear and pure and is perfectly suitable for use as drinking water, untreated water may still be unsuitable for use with your Condair humidification system.

Contact us today to discuss which water treatment solution is ideal for your facility.

RO-H

System Characteristics

- Reduction of scale and other minerals down to 5%.
- Flexible and economic solution for all small scale water treatment projects.
- Complete packaged system with pre-treatment and hardware.
- Small footprint, wall mountable.
